

IP/SIP EMERGENCY STATION "HELPPPOINT™" (VE9811)

FEATURES:

- Compatible with Cisco, Avaya/Nortel, Shoretel, NEC, and All Other Major IP Brands
- Compatible with Virtually Every SIP Based System Including Hosted or On-Premise
- Compatible with Valcom IP FXS Interface Modules
- Sleek, Modern, Lightweight, & Vandal Resistant Design
- Built-In Lightning Protection for Enhanced Reliability in Storm Prone Regions
- Informacast® Version Available
- Compatible with Virtually Every Brand of IP Cameras
- Fully SIP Compliant
- Call-In Identification for Precise Location
- Automatic Hands-Free Intercom Operation
- SIP, Multicast or UDP Communication
- Optional 360-Degree Speaker Array for Emergency Broadcasting
- Programmable Silent Activate Mode for Emergency Listening
- Vibrant & Continuous Identifier Blue LED Dome Light
- High-Intensity Blue LED Flashing Light in Active Mode
- Easy Software for Set-Up, Management, And Control
- Free Supervision Software Included
- Fully Supervised with Visual & Audible Notification Alarms
- IEEE 802.3at, Fiber/110-220Vac, Wireless and Solar
- Station Is Manufactured with Structural Grade Corrosion Proof Aluminum
- Clear Dome Is Manufactured from Tough, Durable UV Resistant Poly-Carbonate Materials
- Corrosion Proof Vandal Resistant Security Type Hardware
- 1 or 2 Button Options for Info, Directions, Etc.
- Redundancy & Survivability with Simultaneous (4) SIP Registrations

DESCRIPTION:

The VE9811 IP Emergency Call HelpPoint Station provides the maximum level of flexibility, reliability, and performance by integrating with the customer network and/or the telephone system as a call station/help point and/or as an emergency broadcast point. Additionally, the VE9811 serves as a SIP endpoint allowing grouping and zoning of broadcast messages as well as initiates emergency calls to predetermined telephone SIP designations. Pressing the "Help" button on the VE9811 initiates a call to any SIP telephone, SIP address, or IP FXO port via a Valcom FXS IP gateway interface module.

With the single press of a button, those in distress are provided immediate two-way connection with security personnel and the camera is instantly activated for emergency viewing of the help point area. The VE9811 provides two-way communication and one-way high level audio broadcasting. When in idle mode, a constant vibrant blue LED light illuminates the VE9811 as to provide rapid recognition for users who need quick access to make a duress call. In addition, the high-intensity blue LED light begins to flash providing rapid identification of the unit for emergency responders. When the called party answers, instant hands-free intercom communication is enabled.
