

IP Multi-Button Call Station

Valcom's IP Multi-Button Call Station provides the maximum level of flexibility, reliability and performance by seamlessly integrating with an existing network or telephone system. The Call Station can serve as an information endpoint, emergency HelpPoint or an emergency broadcast endpoint. With the single push of a button individuals initiate a two-way connection with an information desk or security personnel. The visible Call Station provides a sense of increased security for hallways, pathways, transit centers, building/dormitory entrances and parking garages.
